

Mast driven lift industrial: MDL 015350-1S

Safe, reliable and cost-effective

Easy to transport, install and use

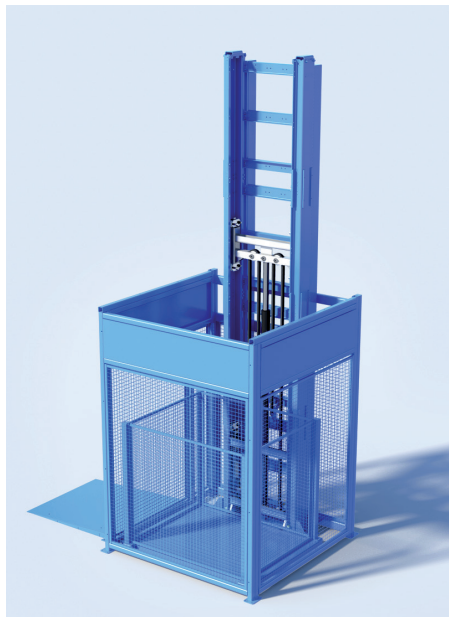

Our new Mast Driven Lift MDL-Industrial will help you drive material flow and improve efficiency in advanced logistics centers and warehouses.

Built with top-quality standardized components to combine reliability and safety with economy, it lifts up to 1500 kg by 3500 mm. Its robust construction guarantees you decades of trouble-free indoor operation.

Mast driven lift industrial: MDL 015350-1S

Type	MDL 015350-1S
Lifting capacity	1500 kg
Lift travel	3500 mm
Loading surface	1650 x 1200 mm
Closed height	90 mm
Lifting speed	150 mm/s
Lifting time	23 s
Motor	4.6 kW 6.0 cc 17L
Weight	1000/2180 kg
Total height	5228 mm
Total width	1850 mm
Total depth	1652 mm

Safety

The MDL is CE-marked and fully compliant with EN 1570-1 or Machine Directive 2006/42/EC, Annex IIA depending on application, with all certificates available on request. It offers safety by position for safe service and maintenance, plus a host of operator protection features such as safety enclosure, door guard locking and emergency buttons. The MDL also has overload protection and a cylinder safety valve for secure positioning.

Low-cost transport

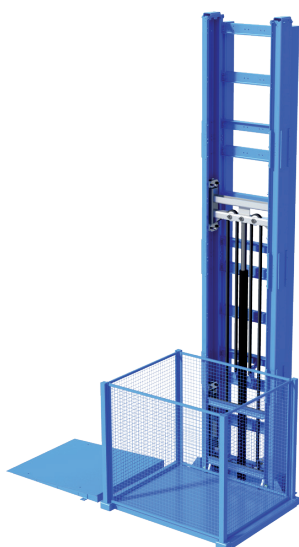

The MDL saves time and money even before it starts operating. No crane is required for transportation, and only low-cost standard vehicles are needed. Delivery times are reliable, ensuring the minimum disruption to your operations. On arrival, modular parts make it easy to get the MDL into your premises even through small entrances.

Quick and easy installation

The MDL does not require a pit, and is installed in just one day by two people. Standard parts assemble perfectly, first time. No welding is needed – fixing is by bolts and screws – which makes installation particularly easy in hazardous or restricted environments.

Comprehensive service contract

The MDL is designed for easy service and maintenance, with standard parts available ex-stock. Our service contract makes service even smarter, with annual inspections and reviews by our authorized experts. For peace of mind, the program includes full risk and safety analyses, while all parts are tested and serviced.

Lifts 1500 kg by 3500 mm

Easy for architects and engineers to implement

Weld-free installation in just one day

For indoor use with or without shaft

Fully compliant with appropriate regulations

Health and safety lie at the core of our business. They always have and always will. Everything else flows from this – the durability of our products to give you years of safe, trouble-free operation; the flexibility of our solutions and services that allow you to focus on your core business; the spirit of innovation that constantly drives us forward. Our whole range is designed to keep your operations running smoothly and your people active and safe.
